ABSTRACT:

CHG DATE=20050802 STATUS=O>A modified cloth characterized by being obtained by polymerizing, on a cloth, an ingredient (X) which is a water-soluble eggshell membrane powder with an ingredient (A) which is a bifunctional monomer represented by the following general formula (1), an ingredient (B)

which is a  
monomer having any of hydroxy, carboxy, amino, sulfo, and phosphate  
groups, and  
an ingredient (C) which is either a monomer having at least one  
aziridine group  
or a water-soluble polymer containing a polycarbodiimide,  
polyethyleneimine, or  
oxazoline group. ?Chemical formula 16! (1) ?In the formula (1), R  
represents  
?Chemical formula 17! (2) or  $-C_nH_{2n}-$  (wherein n is an integer of 1 to  
6); Z  
represents hydrogen or methyl; and a and b each is such an integer  
that a+b is  
in the range of 0 to 50 and x and y each is such an integer that x+y  
is in the  
range of 0 to 30, provided that a+b+x+y is 10 or larger.!
